Hungry for knowledge, adaptable, and self-sufficient. I love teaching myself useful and interesting things, and I'm always thrilled to learn and understand the world a bit more.

Open to any technologies, technical challenges and roles in other areas of development, but mainly looking for remote web developer roles.

Skills

Projects

Frontend **Personal website** using Next.js framework (React) and Sass for CSS deployed on Cloudflare Pages & Vercel.

Fullstack **Todo app**, for learning purposes, built using the MERN stack, uses Zod and Swagger.

Backend **WebAPI** using ASP.NET MVC (C#) for learning purposes.

Fullstack **E-commerce** as course's last year final group project. Uses LAMP stack, no libraries or frameworks. Note I was not the main developer and had other responsibilities, but I did fix the worst app-breaking bugs.

Language

English - C1 Cambridge Cert

Spanish - Native

Education

Complete UTU - EMT Informática - Énfasis desarrollo web - Similar to high school diploma, web development oriented.

Extra

Currently learning Japanese and Italian. Can play guitar (I like music in general). Interested in game development and game engine's implementation and features (Currently learning Rust's Bevy, briefly used Unity).
